Use two numbers from the list below to answer each of the questions.

7	-4	-10	-16	13	-5	3	-8
---	----	-----	-----	----	----	---	----

$$\underline{\quad} + \underline{\quad} = -5 \qquad \underline{\quad} + \underline{\quad} = 8$$

$$\underline{\quad} + \underline{\quad} = -18 \qquad \underline{\quad} + \underline{\quad} = -9$$

$$\underline{\quad} + \underline{\quad} = -8 \qquad \underline{\quad} + \underline{\quad} = 3$$

Find 4 different ways to make this work, using different pairs of numbers :

$$\underline{\quad} + \underline{\quad} = -11 \quad \underline{\quad} + \underline{\quad} = -11 \quad \underline{\quad} + \underline{\quad} = -11 \quad \underline{\quad} + \underline{\quad} = -11$$

Choose three numbers from the list to make this correct.

$$\underline{\quad} + \underline{\quad} + \underline{\quad} = -11$$

There are 3 ways to do it. How many can you find ?
